

NARAYANA

WIND POWER PRIVATE LIMITED

Engineering wind for **Reliable** Power

Harnessing wind energy through
innovative crane-less engineering

ABOUT US

Independent service provider with customized solutions.

Found in the year 2006, started as an Operation & Maintenance service provider, evolved as Major corrective specialist on craneless technology plus we are specialist in Gearbox services and shining now as a specialist on Major corrective works with & without the aid of cranes.

Appreciated by customers for

- On time execution
- Flexible & customized solutions as per the site requirement
- Team performance
- Co-operation with the customer

Vision

To support the world in minimized utilization of non-renewable energy resources by extracting Maximum Energy from Renewable resources

Mission

Continuous stride towards Innovative ideas to extract maximum Energy from the resources

Values

- | OPEN TO INNOVATIVE IDEAS
- | ETHICAL BUSINESS PRACTICES
- | BUSINESS VERTICAL

Project & Engineering Services

- Wind resource assessment
- Micrositing & layout optimization
- Project planning and execution
- Installation & commissioning of WTGs

Operations & Maintenance

- Preventive and breakdown maintenance
- Simple, semi-comprehensive & comprehensive O&M
- SCADA monitoring & performance optimization
- Annual maintenance contracts

Specialized Services

- Gearbox assembly & replacement
- De-erection and re-erection
- Decommissioning & repowering support
- Major component repair & refurbishment

Trading

Selling and Buying major components of all models of WTC, includes pre-owned wind turbine

TECHNOLOGY

Crane-less LIFTECH - Advanced Technology

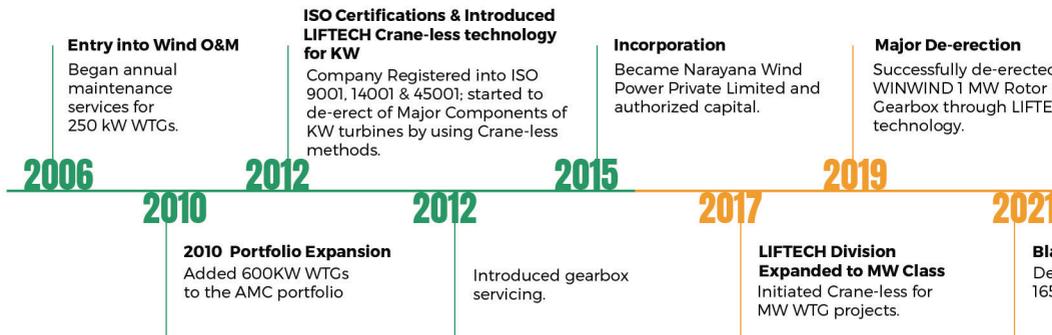

LIFTECH crane-less lifting technology is an in-house designed advanced core system enables the de-erection and re-erection of major components such as gearboxes, generators, main bearing housing, rotors and nacelle, even in space-constrained or challenging site conditions. By reducing crane dependency, LIFTECH minimizes downtime, lowers operational costs, and improves overall project efficiency while maintaining the highest safety standards.

To date, LIFTECH Technology has enabled the de-erection and re-erection of 500+ Single Blade, 600+ Gear boxes, 200+ Generators, 600+ ROTORS
Total craneless 2000+ operations

Fact Check

Proven technology over 10+ years, LIFTECH operates up to 2.4 MW and is advancing towards 3MW to 5 MW capacity

Timeline

20 years of expertise, and we developed our quality standards into world-class capacity 2MW to 3 MW platform for Service and component replacement

ACCREDITATIONS

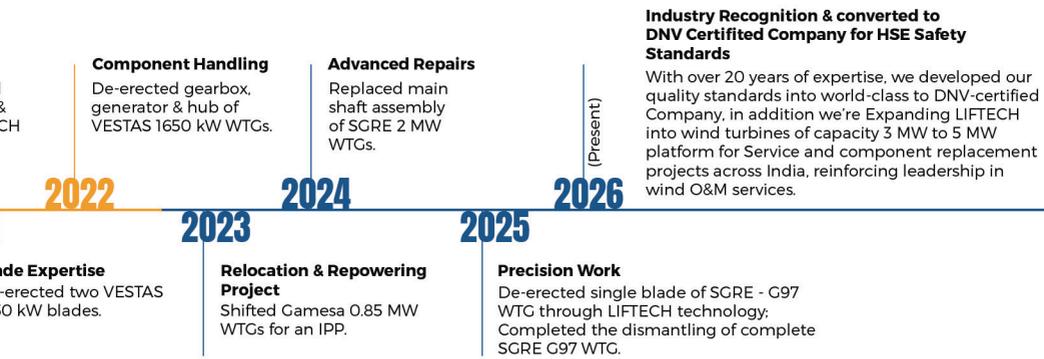

Safety certified

Every work at NWPPL is carried out under rigorous quality systems and internationally certified management standards like DNV

Certified Management Systems:

- ISO 9001:2015 - Quality Management
- ISO 14001:2015 - Environmental Management
- ISO 45001:2018 - Occupational Health & Safety

...s to DNV-certified Company, & also Expanding LIFTECH into wind turbines of
...ent projects across India, reinforcing leadership in wind O&M services.

Credibility & Infrastructure

NWPPL is undoubtedly considered as one of the leading wind energy independent service providers (ISP), recognized for 98% perfection, responsiveness, and engineering technical knowledge with best infrastructure facilities.

Proven Industry Track Record

- **20+ years** of wind industry experience
- **200+ trained professionals**
- **150+ MW** under operations & maintenance
- Expertise across multiple WTC models and capacities

**PITCH BEARING
REPLACEMENT FOR 1.65 MW**

**GEARBOX & MAINSHAFT
REPLACEMENT FOR 2 MW**

WINWIND 1000 KW

VESTAS 600 KW

Quality & Safety

- Zero customer complaints
- Prompt Execution
- Nil Incidents
- 100 % adherence to HSE regulations
- Routine risk assessment
